

INSTITUTE OF GENETIC ENGINEERING

ACADEMIC SESSION-2021-22 BEST PRACTICES

Practice 1

MENTORING SYSTEM

1. **Objective** – The COVID-19 pandemic caused drastic changes in education system ,affect students' mental health and perception of study conditions. . Mentoring may have mediating effects
2. **The context:** The scheduled online mentoring sessions were fruitful aspsycho-social and academic improvement of the mentees can be achieved.
3. **The practice** - . The continuous e–mentoring.
4. **Evidence of success**-better results in examinations, regular attendance and participation in co-curricular activity, better discipline

Practice 2

EXTENSION ACTIVITY

Objectives This practice is aimed at reaching out to the community with the message of Thalassaemia prevention.

Thalassaemia, the number one genetic disorder in India is very common in West Bengal. There are enormous social sufferings for this preventable disease .One of the main reason is lack of awareness.

Thalassaemia Foundation, NSS along with our students reach out to community for awareness and prevention in a regular basis.

Mass awareness campaign had been done in every year on “World Thalassaemia Day”.

Other Community service -Hope Manjari and NSS during the lockdown distributed food in the neighbouring places, Helping neighbouring children (below poverty line)to learn basic things and distribution of exercise books and stationeries.
