

INSTITUTE OF GENETIC ENGINEERING

2018-2019

DISTINCTIVENESS

- Pursuit of excellence in education is our first and foremost distinctive feature which our Institute follows along with other associated features like extension activities of Thalassaemia prevention and screening programme, research on Genetics and other related branches.
- We have allocated different areas of research to existing departments of this institute. As agriculture is very promising in West Bengal, so Dept. of Biotechnology undertakes Plant Biotechnology, Tissue Culture of Medicinal Plants and Fish Biotechnology projects. Dept. of Genetics continues prevention, awareness and management of Thalassaemia patients on regular basis.
- Apart from this diagnosis of other genetic disorders also continues in collaboration with Suraksha Diagnostics (Molecular Cyto-Genetics and Diagnostic Applications) Dept. of Microbiology is continuing “Bio-Diesel” Project and other Bioremediation projects.
- Few Students from different departments are engaged voluntarily in “Hope-IGE”, Education for all project (**Manjari**) for education of slum children of nearby locality.
- The Academic excellence is reflected in the university result where 10 students got topper position and got Medal in this calendar year from University.
- In this year 60 students of this institute were enrolled in NCC. 04 camps were conducted where 45 cadets were presented. 10 received B grade certificate and 01 C grade Certificate. One of our students went to RDC camp, YEP camp, NIC/SNIC and Commissioned.
