

INSTITUTE OF GENETIC ENGINEERING

30, THAKURHAT ROAD, KOLKATA-128

ACADEMIC SESSION 2021-2022

INSTITUTIONAL DISTINCTIVENESS

The priority and thrust area of this college is the overall development of the students through teaching-learning and extracurricular activities and to excel in every possible way. The institution with a campus of lush green landscape provides an inclusive environment for students of diverse socioeconomic and cultural backgrounds. Students are not only coming from different states of this country but are also from neighbouring countries.

Students were always the priority of this college and they were exposed to a familiar atmosphere with a mentor system. The slow learners were identified and encouraged to engage in various forms of learning procedures. Students were also involved in delivering lectures, seminars and presentations on different subjects. Mentors were always helpful to their students to focus their interest in the study in the new normal period. Different webinars/activities were organised by the institution and activities organized by NSS and IQAC to keep the students engaged and connected.

The students coming from different background gets ample opportunity for progressing into higher studies in its learner-centric environment and is facilitated for holistic development in terms of socio-cultural ethos to become a responsible citizen of the country.
